

# Ethics in Children's Environmental Health Research March 2004

On March 5 and 6, 2004, the CEHN held a ["Workshop on Ethical Issues in Children's Environmental Health Research."](#) Five leaders in the field were asked to submit papers outlining the issues of:

- Research in pediatric environmental health (Bruce Lanphear),
- Ethical Issues Unique to Children in environmental health research (Maura Ryan),
- Community involvement (Peggy Shepard),
- Relationship with industry and other funders (Richard Sharp), and
- Privacy (Celia Fisher).

Workshops were held discussing these 5 areas. During 2005-2006, Six individual manuscripts combining the initial papers with input from the conference have been developed under the guidance of Cynthia Bearer, MD, PhD. These have been accepted for publication as a mini monograph in *Environmental Health Perspectives* in October 2006. They are now available on the EHP webpage.
